IBM SkillsBuild Data Analytics & AI Internship Project

Project Overview

This project is submitted as part of the IBM SkillsBuild Data Analytics & AI Internship program. It demonstrates data preprocessing, exploratory data analysis, and visual data insights using Python.

Student Details

- **Student Name:** Rahul
- **Program:** IBM SkillsBuild Data Analytics & AI Internship
- **Platform:** IBM SkillsBuild / AICTE / Edunet Foundation

Project Structure

- main.py: Main Python script performing data analysis and visualization setup.
- requirements.txt: List of dependencies and packages required to run the project.
- Project_Report.md: Detailed report covering methodology, findings, and outcomes.
- README.md: Project documentation and setup guide.

How to Run

1. Install dependencies:
   pip install -r requirements.txt

2. Execute the Python script:
   python main.py
